

POSTER PRESENTATIONS 2018

Charles Knoery	PhD Student	Department of Rural health and Wellbeing	Can an integrated digital technology-based intervention improve the accuracy of pre-hospital diagnosis in patients with suspected Acute Coronary Syndrome.
Matthew Fraser	PhD Student	Department of Rural Health and Wellbeing	Using the outdoors as a motivator in health management
Sara Bradley	Research Fellow	Department of Rural Health and Wellbeing	Sustainable Remote and Rural Healthcare: UHI evaluation of the Being Here Programme 2014-2017
Henk Pieter Sterk	PhD Student	Environmental Research Institute	Assessing peatland condition using UAVs: not getting mired in “bog” data
Julie Cassidy	PhD Student	Institute for Northern Studies	Highland Park: Sagas and Stills. A social history of whisky and the Highland Park Distillery in Orkney
Chloe Rodgers	PhD Student	Centre for Health Science	Investigation of the roles of anti-VEGFR1 natural antibodies in human plasma in hepatocellular carcinoma.
Elizabeth Masden, Nina O'Hanlon, Neil James, Alex Bond	Research Staff	Environmental Research Institute	Quantifying nest incorporation of anthropogenic debris: recommendations for monitoring and standardisation
Sharon Hutchison	Post Doctoral Researcher	Genetics and Immunology Research Group	Genomic events targeting the antigen presentation genes in melanoma
Leonie Schulz	PhD Student	Centre for Mountain Studies	The relationship between accessibility and visitor distribution in the Western Cairngorms National Park along the A9
Anna Terje, Sarah-Anne Munoz, Sandra MacRury	Research Staff	Department of Rural Health and Wellbeing	Voices of Community Navigators – Enabling wellbeing through eHealth and Social Prescribing in Scotland
Kara Hicks	PhD Student	Department of Nursing	Physical Activity in Older Adults with Sensory Impairment
Khristin Fabian, Emma Clayes	Research Staff	Perth College	Staff and student survey of VLE use: engagement, usability, barriers and suitability
Rebecca Mathews	PhD Student	Department of Rural Health and Wellbeing	Impacts of Technology-enabled Diabetes Service Delivery to Care Homes: A Systematic Review and Service Evaluation
Euan Bowditch	Researcher	Inverness College	If a forestry contractor goes out of business, does anyone hear them fall? FACE YOUR FOBIA (Forest Business Innovation and Advancement)
Nikki Perrin, Sandra MacRury, Janet Heaton and Hugo van Woerden	Post Doctoral Researcher	Centre for Health Science	Reducing Unscheduled Care for People with Diabetes
Emma Clayes, Kimberley Sorrie	Research Staff	Perth College & Moray College	The Effect of Gaelic Proficiency, Word Type and Processing Task on Recall, Recognition and Emotional Intensity Ratings

Jacob Roberts	PhD Student	Centre for Health Science	Optimisation and evaluation of APO-B, VEGFR1, VEGFR2 and LOX-1 natural antibodies, as predictors of cardiovascular risk.
Karen Boswarva	PhD Student	Scottish Association for Marine Science	Habitat mapping the fjords of Chilean Patagonia using an Autonomous Underwater Vehicle
Judith Braun	PhD Student	Scottish Association for Marine Science	Less Ice, More Production? A seasonal study in the Arctic Ocean
Matt Sillars	Phd Student	Inverness College	Urban Humanities: A narrative inquiry into social-ecological resilience in an urban community in Inverness across 50 years using the Panarchy model
Huiyi Zhang	PhD Student	Environmental Research Institute	A review on utilization of plastic waste as a sustainable adsorbent for removal of organic and inorganic contaminants from aqueous environments
Michael Redford	PhD Student	Scottish Association for Marine Science	Artificial reef creation using decommissioned pipeline protections – environmental performance and fisheries enhancement potential in the North Sea.
Derek Elsby	PhD Student	Environmental Research Institute	Antimicrobial Resistant E. coli in Scottish Wild Deer - Exploring links with Agriculture
Fatima Gianella, Keith Davidson, Michael Burrows, Michael Edwards	PhD Student	Scottish Association for Marine Science	Assessing the risk to aquaculture from harmful algal blooms (HABs) in the aquaculture industry
Tom Carew	PhD Student	Centre for Health Science	Elucidating the mechanisms of intracellular protein degradation
Clare Carolan, Michael MacPhee, Gareth Davies	Research Staff	Department of Nursing	Co-designing palliative and end of life care education in the BSc Nursing curriculum: a study protocol
Paul Gaffney	Research Staff	Environmental Research Institute	Ecohydrological change following re-wetting of a deep-drained raised bog
Alasdair Bachell	PhD Student	Perth College	The potential for the refurbishment of historic hydro power generation for the benefit of local communities in the Highlands & Islands region
Eilidh Scammell, Jacob King	Research Staff	Sabhal Mòr Ostaig	Researching Scottish Gaelic place-names: The work of Ainmean-Àite na h-Alba
Elise Depauw	PhD Student	Scottish Association for Marine Science	
Charles Knoery, Janet Heaton, Sandra MacRury, Raymond Bond, Aaron Peace, Stephen Leslie	PhD Student	Department of Rural health and Wellbeing	Can an integrated digital technology-based intervention improve the accuracy of pre-hospital diagnosis in patients with suspected Acute Coronary Syndrome.
