

Transition
Turrieffield

Shetland

What we do:

- Grow fruit and vegetables for the local community
- Encourage and support people to 'grow their own'
- Show how fruit and vegetables can be grown using minimum fossil fuels.

Why we do it:

- To have more fresh local food available in Shetland
- To give local people more access to high quality food
- To increase food security for Shetland
- To help the community reduce its carbon emissions
- To help reduce our contribution to climate change

Grow Shetland

- 3 year project 2021-24
- Supporting individuals, groups, communities, schools
- Start growing & grow better
- Increased food security
- Reduced carbon footprint
- Reducing food poverty

Grow Shetland

We provide:

- Help with planning and using a growing space
- Shetland specific growing advice
